Algebraic graph theory is a branch of Mathematics that studies graphs by using algebraic properties. There are two main connections between graph theory and algebra. These arise from two algebraic objects associated with a graph: its adjacency matrix and its automorphism group. PDF Algebraic Graph Theory Graduate Texts In Mathematics ... Algebraic graph theory is a fascinating subject concerned with the interplay between algebra and graph theory. Algebraic tools can be used to give surprising and elegant proofs of graph theoretic facts, and there are many interesting algebraic objects associated with graphs.
