The network is trained to maximize a likelihood criterion derived from a spatial mixture model of the observations. Recursion (computer science) - Wikipedia Recursion in computer science is a method of solving a problem where the solution depends on solutions to smaller instances of the same problem (as opposed to iteration). The approach can be applied to many types of problems, and recursion is one of the central ideas of computer science.. The power of recursion evidently lies in the possibility of defining an infinite set of objects by a ... Introduction to Algorithms - Wikipedia Introduction to Algorithms is a book by Thomas H.
